Hantao Jiang

Shanghai Jiao Tong University
(+86)19877376168
eric_jht@sjtu.edu.cn

*A third-year undergraduate interested in **Computer Vision, Machine Learning and Generative models**.*
Concentrating on Training-free Controllers for Vision Generation and Efficient Generative Models.
Sincere desire in deeper research experience and broader learning.

Education

(Current) ACM Honor Class, Shanghai Jiao Tong University, GPA: 3.71/4.0
Mentored by Prof. Xiaohong Liu, SJTU Multimedia Lab

Relevant Courses
Computer Vision, Online Algorithms, Foundations of Data Science, Machine Learning, Information Theory, Optimization Methods, Probability Theory

Academic Activities

- Co-designed Mask-Annealing Training Strategy and other necessary works in an enterprise cooperation project of Prof. Liu's lab, paper submitted to ECCV.
- Designed general tactile encoder submodule structure, evaluated its compatibility and training-free enhancement for VLAs on contact-rich manipulations, paper accepted by ISAI.
- (Early) Participated in task design for ProjDevBench, repo-level coding agent benchmark.

Interns & Extracurriculars

Long-term Internship in SJTU Multimedia Lab
Shanghai | June 2025 – Present

- Deep participation in group projects, accumulated experience of entire research workflows.
- Organized image-mask dataset and experiment codebases for internal use.
- Proceeding research on controllable vision generation, while learning widely in generative structures and training efficiency.

Tsinghua University Summer School
Beijing | June 2025 – August 2025

- Cooperation and forums on system design and accelerated calculation with researchers in Institute for Interdisciplinary Information Sciences.
- Received 4th rank out of 16 in the frontend-backend system competition, gained insight on systematic structure design.

Honors & Awards

- Full-time Zhiyuan Honors Scholarship | Awards for excellence
